

GROUP 4: ASSETS WORTH LESS THAN \$2,200

Workshop 3: Our Choices

Sandy Firdemont

I am 4 years old. I live in Haiti with my mother. I lost my father during a cholera epidemic and we were left to survive on our own. Mum could not afford to give me the right foods that I needed to grow. I was very malnourished and was unable to learn how to walk. My mum now receives a special 'Mighty baby' food supplement that gives me the extra nutrients that I need for both my body and brain to develop. This vitamin powder has made me bigger and stronger.

[See Sandy's video here](#)

"I now have the energy to play with my friends and even run!"

Haiti?

What is malnutrition and how does it affect children and their long-term development?

What is the cause of cholera? How can we prevent the spread of such water-based diseases?

Every child has a right to water. Have the Millennium Development Goals improved access to water?
